COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE

COMMISSIONER FOR PATENTS
ALEXANDRIA, VIRGINIA 22313

SIR:

Applicant acknowledges with appreciation the indication of allowability of the claimed invention. In response to the Examiner's Statement of Reason for Allowance in the Notice of Allowance of June 20, 2006, Applicant respectfully submits the following comments.

In the Examiner's Statement of Reasons for Allowance on pages 2 and 3 of the Notice of Allowance mailed June 20, 2006, paragraph 1 states:

However, none of the prior art teaches or suggests claimed combination of limitations including:

- A braking time calculation means for measuring a period of the rotation detection signals to calculate speed deceleration rate of the motor and calculate a braking time between braking start and stop of the rotation of the motor based on rotational speed of the motor at a time of the braking start and the calculated speed deceleration rate, so that the motor drive means is controlled based on the calculated braking time, including

- Rotation detection means, which generate a rotation detection signal at a frequency proportional to rotation of the motor.

Reply to Notice of Allowance of June 20, 2006

However, Claims 9-16 do not include the "means plus function" language used in the above Reasons. Accordingly, it is respectfully submitted that the above-quoted statement does not apply to any of Claims 9-16.
